EPA Region 5 Records Ctr.

Dear Charlie:

We are sending to you, Jerry Willman and Stuart Hersh the revised pages for the workplan for additional work to further delineate the NAPL contamination at the Lenz Oil Site. The revised workplan pages are based on the drafts provided to you on March 17, April 21, May 5 and May 24, and have been revised in accordance with our various discussions. After approval by the State and USEPA, we will reissue a complete, final revised workplan. As we have noted, the revised workplan is in the form of an addendum to the Lenz Oil Field Sampling Plan. We are prepared to recommend that the Settling Respondents undertake the work described once the agencies have indicated their approval of the workplan. Please advise us, either by phone or in writing, by the close of business on Thursday, June 21, regarding the response of the agencies to this proposal. As before, please feel free to call John Imse or Elsie Millano as ERM (708/904-7200) or me if you have any questions concerning the revised workplan.

Once again we must note that this revision is submitted in an attempt to satisfy the desire of the agencies for certain additional data. Because it is being submitted for settlement purposes, it is not admissible evidence. Submission of this revision is not an admission by the Settling Respondents that the additional information is necessary or required

Mr. Charles Brasher

under the RI/FS Workplan or to produce a final FS. We offer these revisions in a spirit of cooperation in an effort to resolve outstanding issues regarding Site information.

We await your response to these revisions to the workplan.

Sincerely,

A handwritten signature in black ink, appearing to be 'E. Bernstein', with a long horizontal flourish extending to the right.

Eugene H. Bernstein
